🐙 github.com/truongnhatcuong

Full Stack Developer with 1+ year of experience building scalable web applications using Next.js and NestJS. Experienced in leveraging AI tools such as ChatGPT, GitHub Copilot, and modern LLM APIs to accelerate development, improve code quality, and deliver intelligent product features. Passionate about building efficient, AI-powered software solutions.

■ EXPERIENCE

● Mar 2026 – Present Fresher FullStack

HifivePluss Company
Da Nang, Vietnam

- Engineered a full-stack E-commerce platform using NestJS, Next.js, and MongoDB, successfully accommodating 1,000+ monthly users and enhancing customer engagement.
- Implemented AWS S3 for efficient file uploads and integrated real-time features with Socket.io, boosting user interaction speed by 30% and improving overall user experience.
- Developed secure RESTful APIs utilizing JWT authentication and comprehensive Swagger documentation, achieving a 20% reduction in API errors and enhancing system reliability.
- Leveraged AI-assisted development tools (ChatGPT and GitHub Copilot) to accelerate implementation, debugging, API integration, and documentation, improving overall development efficiency.

● Apr 2025 – Mar 2026 Intern FullStack

Dsoft Company
Da Nang, Vietnam

- Spearheaded the development of responsive, reusable UI components using Next.js and Tailwind CSS from Figma prototypes, achieving a 40% reduction in front-end development time for new features.
- Collaborated with an Agile team, managing version control with Git and conducting code reviews, resulting in a consistent task completion rate of 85%.
- Optimized routing, layouts, and Server-Side Rendering (SSR) data fetching, enhancing page load speeds and improving Core Web Vitals scores by 65%.
- Executed content mapping and validation from CMS to UI, resolved UI bugs, and improved responsiveness across devices, elevating user experience metrics.
- Utilized AI tools to convert Figma designs into reusable React components, generate boilerplate code, and optimize UI implementation while maintaining code quality.

■ PROJECTS

Booking Hotel | *Next.js, Express.js*

Oct 2025 – Present

- Built a full-stack hotel booking platform with secure authentication, booking management, and availability calendar.
- Integrated AI-powered content generation and voice search to improve content creation and user experience.
- Implemented automated email notifications for booking confirmations, cancellations, and password recovery using Nodemailer.
- **Github:** [Frontend & Backend](#)

E-commerce Clothing | *Next.js*

Feb 2024 – Feb 2025

- Developed a robust e-commerce platform enhancing user experience for over 1,000 concurrent users.
- Built an AI-powered chatbot using Retrieval-Augmented Generation (RAG) techniques to provide contextual product recommendations and customer support.
- Implemented secure JWT authentication and role-based access control, ensuring data protection and compliance.
- Architected a full-stack e-commerce solution that supports real-time transactions through seamless integration of Stripe and PayPal APIs.

■ EDUCATION

• Jun 2022 – Feb 2026 Bachelor of Science in Software Engineering
Duy Tan University – GPA: 3.18/4.0
Da Nang, Vietnam

■ SKILLS & LANGUAGES

LANGUAGES

English (TOEIC 525)

FRONTEND

Languages

JavaScript • TypeScript • SQL

Frameworks

React.js • Next.js

Styling

HTML5 • Tailwind CSS • Zustand

BACKEND & TOOLS

Backend

Node.js • Express.js • NestJS

Database

MySQL • MongoDB

Tools

Git • GitHub • Docker • Postman

Deployment

AWS S3 • Nginx • PM2 • Linux (Ubuntu)
